

THE 4 C'S

Vector EPro8 Challenge Information

Hi, our names are Ben, Siahn, Isaac and James. Our group is a great mix of builders and electricians. Ben and Siahn being the builders and James and Isaac being the electricians. Coincidentally half our group is in one class and the other half is in another class.

We are going to change our name to 4'Cs, being Critical Thinking, Creativity, Collaboration and Communication, and that there are four of us so it all makes a lot of sense.

What do we think about engineering and the Vector EPro8 Challenge:

Ben:

I love engineering. It's fun to learn and it's nice to see if what you made works.

Siahn: I really love engineering, because you really have to think about what you do and if it will work with what you are doing. You also have to think about how you need to communicate with each other and I what

	<p>would work the best for your group, I would love to carry on engineering in my future and be passionate about it. I love doing the EPro8 heats this year because I have always wanted to do it, so thank you to Mr Din our Technology teacher for believing in us and always helping us with science so we can carry it on in the future.</p>
<p>James: I think engineering is really fun, interesting and really great thing to know for the future. I also like working with wires and doing maths components</p>	<p>Isaac: I've just loved doing engineering and Technology since I was a year 2-3</p>

We are looking forward to the final because we might be the first Clevedon team to win the grand final. Another reason we are looking forward to the final is that we are wanting to improve our engineering and wiring skills because it's a great skill to have and it's really fun to practice. We have found out how essential it is to use teamwork in the challenges we are provided. The challenge we choose for the heats was the Uncle Albert challenge which we had to make a bed, a bedside table ect. The challenge we chose for the semi - final was the crowd control.
