

We are the **Justice League**, why? No one knows, half our group wasn't here when we picked it.  
This is our Logo:

Our team consists of:

Ryan Cleland

Lewis Patrick

Karya Atalag

Sara Marshall

Ryan and Lewis excel at mathematics and electronics whilst Karya and Sara have supreme powers in construction and building.

Two of our members have already been to the Vector EPro8 \Challenge and so we already have experience within this challenge.

We are a group that is very interested in engineering and sharp-witted minds. We can collaborate well with each other and find a solution to everything.
